(🔒/◀ + ❄)

Tap these buttons to activate ignition controlled door locks. Your doors will lock or unlock when you turn the key on or off. If you have a remote start, your doors will lock when you press the foot brake.

ALARM LED CODES

If you have an alarm and optional LED(s) installed, it will flash once a second if armed. If your alarm is triggered then the LED(s) will flash more than once until it is disarmed. See the table below for what each LED code represents.

ALARM TRIGGER EVENT	LED FLASHES
Door, Hood, Trunk, or Ignition On triggered	2, Pause, Then Repeat
Full triggered shock sensor	3, Pause, Then Repeat
Panic Mode	5, Pause, Then Repeat

Valet Mode: If your remote start is not working, you may be in Valet Mode. Your parking lights will also not flash. Your doors will still lock and unlock. To exit Valet Mode, tap the Lock and Trunk buttons at the same time.

START ERROR CODES

PARKING LIGHT FLASHES	REMOTE START ERROR
3 then 1	1: Motor running
3 then 2	2: Key in ignition on position
3 then 5	5, Foot brake on
3 then 6	6: Hood open
3 then 8	8: Tach or voltage sensing failure
3 then 10	10: System is in Valet Mode

To reprogram your remote first cycle the key in the ignition 5 times within 7 seconds. Parking lights will flash. After that tap the Lock button on your remote. Repeat for any additional remotes. If you receive two parking light flashes, your system has exited remote programming mode and you must retry.
